iPRINT

ID Card Printing for Schools and Universities

iPrint is an advanced card printing solution by CompuLynx, designed to streamline the issuance of secure, personalized ID cards in schools, colleges, and universities. Whether it's for students, teaching staff, or non-teaching personnel, iPrint allows institutions to print high-quality cards instantly—right from the front desk or admin office.

KENYA UGANDA TANZANIA

About iPrint Solution

iPrint® The system integrates easily with Student Information Systems (SIS), school ERPs, and other education management platforms, ensuring accurate data synchronization and secure card issuance. It supports various printer models like Evolis Primacy 2 and Sigma series, making it adaptable to different environments and institution sizes.

With built-in security features such as AES-256, RSA, and 3DES encryption, iPrint ensures that personal and institutional data remain protected. Schools can customize ID templates to include photos, names, admission numbers, barcodes/QR codes, and even color-coded access levels.

Whether it's for identity verification, attendance tracking, library access, cafeteria use, or campus security, iPrint empowers academic institutions to issue multi-purpose smart cards in minutes—improving operational efficiency and student experience.

iPrint Key Features

Instant ID Card Printing
Issue personalized student and staff cards instantly at admission desks or admin offices.

Custom Design Templates
Supports Logos, colors, and layouts matching your institution's branding.

Bulk Printing Capability
Seamlessly print hundreds of ID cards during new term registrations.

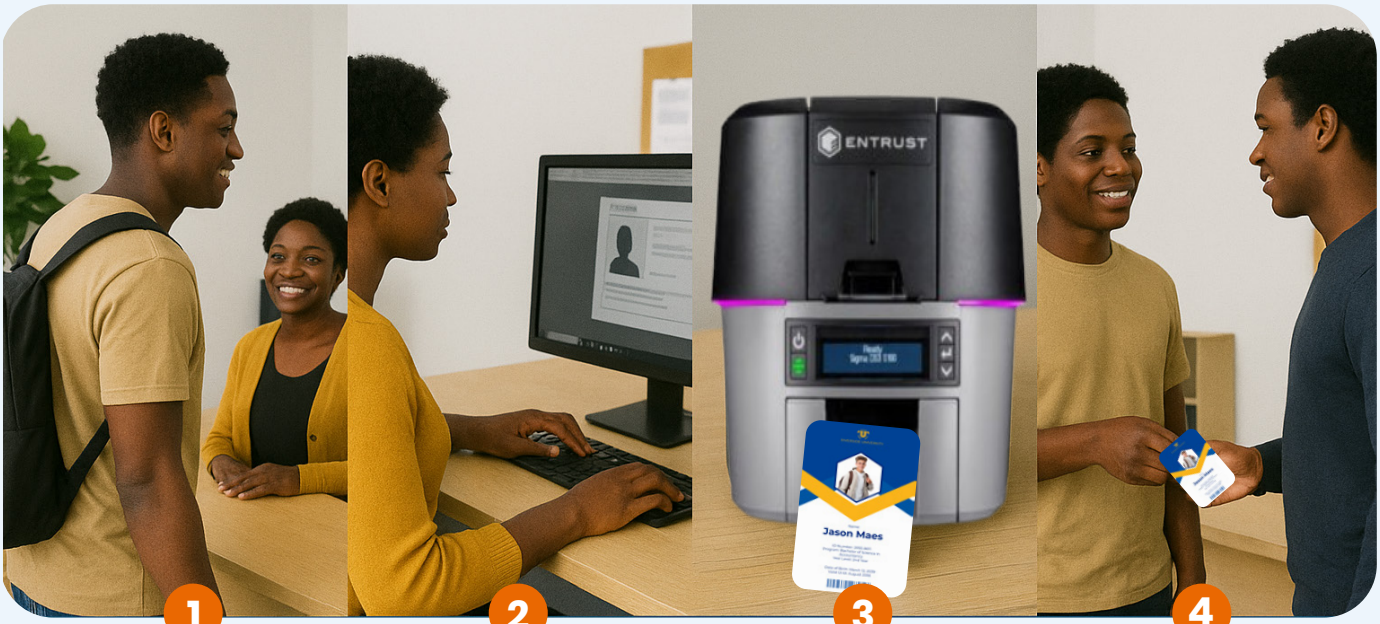

Multi-Purpose Cards
Use cards for access control, library management, cafeteria payments, and exam registration.

Seamless Integration
Compatible with Student Information Systems (SIS), ERP, and attendance platforms.

Secure Data Handling
Ensures encryption with RSA, AES 256, and 3DES for student and staff records.

Educational institutions can easily print student and staff ID cards by entering basic details such as name, admission or employee number, and department. The system also generates customizable reports that can be filtered by selected fields (e.g., class, faculty, card type) and exported in PDF format for administrative use.

How It Works?

1

Capture Student/ Staff Details

Enter or import personal data such as name, photo, admission/employee number, and department from your student information system.

2

Customize & Preview Card

Choose a pre-designed template or create your own layout with logos, colors, and relevant fields.

3

Print Instantly

Use a connected desktop card printer to produce high-quality ID cards on the spot.

4

Issue & Activate

Hand over the ready-to-use ID card—students and staff walk out fully equipped on the same day.

Typical Use Cases in Education?

Use Case	How iPrint Helps
New Student Registration	Instantly print student ID with photo, name, class, and admission number.
Staff Identity Cards	Issue customized cards with roles, departments, and barcodes or QR codes.
Library & Cafeteria Cards	Integrate with backend systems to serve as library membership or meal cards.
Access Control	Print smart cards for controlled entry into labs, hostels, or exam halls.
Event/Exam Badges	Generate temporary or batch cards for attendees, guests, or exam candidates.

Key Benefits of iPrint For Financial Institutions

Faster Onboarding
Issue ID cards within minutes during admissions or staff onboarding.

Personalized Cards
Tailored to match academic structure (classes, streams, departments).

Lower Operational Cost
No need to outsource printing—everything is done in-house.

Improved Safety
Easily identify and track students and visitors using secure, smart ID cards.

Integration Ready
Works well with your school ERP, attendance, or access systems.
